RESEARCH ANALYSIS & POLICY

***PLOS Biology* and *PLOS ONE* Meta-research Collection**

Published November 16, 2021 / Curated Collections

This Collection highlights some of *PLOS Biology*'s Meta-Research articles since 2016 as well as some of *PLOS ONE*'s articles over the past few years, all about "research on research," or the science of science. It combines sociological, bibliometric, and more theoretical approaches to the study of science, from the structure of rewards and incentives in research to gendered dynamics, or the impact of journal policies on reproducibility.

Feature your research in this Collection by submitting to *PLOS Biology* or *PLOS ONE*.
