

Introduction of Digital Health: Benefits and Challenges

Through this webinar series, we aim to help healthcare professionals to:

- Understand the need for digital transformation in the current healthcare system.
- Recognise emerging digital technologies and understand their applications in healthcare.
- Explore the benefits and risks for digital solutions in healthcare.
- Understand the barriers and facilitators in digital health research and transformation.
- Analyse and appraise real cases of digital health transformation.
- Encourage the conduct of digital health research.
